

There are more than 2 million orphans in Viet Nam, 7% of whom have been orphaned by AIDS. In spite of this, no antiretroviral(ARV's) were available in Viet Nam prior to 2005 when WWO brought this life-saving medicine into the country. WWO is the first Non-governmental organization (NGO) to train Vietnamese pediatricians and nurses in the care of children with HIV-AIDS, so that they can treat Vietnamese orphans with ARV's. In Viet Nam WWO operates three (3) treatment sites in orphanages.
